

AsWood *by dynea*

Emission levels as low as wood

AsWood™ is Dynea's new family of low emission adhesives. With emissions at the same level as natural untreated wood, AsWood is the ideal adhesive solution for wood based products used in places where people are particularly sensitive to indoor air quality. For example: kindergartens, schools, hospitals, homes, offices and automobile interiors. AsWood adhesives meet current as well as projected formaldehyde emission standards globally.

AsWood

by dynea

Emission levels as low as wood

Dynea's proprietary AsWood™ adhesive solutions are currently available for form-bending, solid wood lamination, flooring / parquet as well as for select composite board applications. As we work together with our customers to design tailored adhesion solutions based on AsWood technology, we will see a growing number of applications for low emission solutions.

With Dynea's new AsWood solutions customers can meet current and projected emission requirements globally. This promise is based not only on laboratory results but has been verified under authentic conditions in long-term manufacturing trials.

AsWood™ performance

AsWood adhesive solutions are used in the same way as traditional systems. They provide excellent mechanical strength, bond strength and water resistance and are tailored to solve individual production and market challenges faced by each customer.

AsWood – helping meet changing market needs

The challenges faced by you in your business and manufacturing processes change with the demands of technology, the market and public opinion. In Dynea, we are committed to deliver just what you need to help you meet these challenges and secure future business opportunities. By continuously improving the performance and value of our

product and service technologies, we can help you create value for your company as well as for your own customers.

AsWood is the solution for you whether you need

- emission levels to be at the same level as natural untreated wood to enhance the value of your end-product,
- safe-guard your brand image, or
- meet formaldehyde emission requirements without losing product characteristics.

AsWood adhesive systems are tailored to meet the individual production and market challenges faced by each customer.

AsWood from Dynea is an example of our commitment to help customers meet changing market needs.

Range of typical emission levels and requirements

just what
you need

We believe that
no two customers are the same.
The business and process challenges
you face are unique to you.
