100% wool sustainable, durable, recyclable, without synthetic additives
Roof extension, Ceiling – overhead insulation, storey ceiling, tie-beam roof, Interior & exterior wall, Wooden construction

PRODUCT DESCRIPTION

- The compact thermal and sound insulation in high insulation thicknesses from 120 to 300 mm in one (single layer!) insulation roll. The thickness is elastic and also encloses cable ducts without further processing.
- Small excesses in width flexibly adapt to the construction.
- The insulation roll for the installation in **horizontal** and **inclined supporting structures** (rafters, frames, transoms, etc.).

WOOL PROTECTION

- **IONIC PROTECT®** biocide-free wool protection, long-term tested by EAD/CUAP standards and patented procedure.
- Is a slight alteration of the molecular protein structure of the wool fibre through a **plasma-ion treatment**. This specific process is unique as it permanently prevents the wool from being a nutritional source for wool parasites.

INSTALLATION

- **Quick installation**, no waste and dust collect. Ideally suited for working overhead.
- Insert the insulation rolls from bottom to top and fix the surface felt to the rafters by stapling it laterally.
- The rolls can be cut to length by **tearing by hand** or with the **ISOLENA** cutting device.
